MOONLESS NIGHT - ST

Vinyl / Tiles

Carpet tiles from 2tec2 are designed for long and intensive use thanks to the innovative material they are made from: a glass fibre core coated with vinyl and finished with a homogeneous backing. A high-tech floor covering that offers quite a few advantages. First of all, the carpet tiles dampen noise and provide a pleasant, warm walking contact. Furthermore, the product is water repellent, wear resistant and suited both for indoor and outdoor use. The woven vinyl fabric cannot absorb dirt, so that stains can be easily removed. In brief, a durable solution for commercial or residential projects, both indoors and outdoors. As a part of the vinyl tiles collection, the groundbreaking Seamless Tiles (ST) are really one of a kind: when fitted in a uni-directional pattern, these floor tiles have the sleek, unbroken appearance of a wall-to-wall floor covering.
